Full Stack Assignment – 37

Assignment ID: FSD-37

Title: Controlled Submission Deadline System

Duration: 3 Hours

1️⃣ Objective

Build a **Controlled Submission Deadline System** where users submit entries and administrators manage deadlines.

The system must strictly enforce submission cut-off times.

2️⃣ User Roles

USER

- Register and log in
- Submit entries
- View submission status

ADMIN

- Register and log in
- Define submission deadlines
- View all submissions

3️⃣ Functional Requirements

Authentication & Authorization

- JWT-based authentication
- Protected APIs
- Role-based UI & backend access

Submission Management

- ADMIN sets submission deadline
- USER submits entries
- All submissions stored in database

4️⃣ Business Rule (Critical)

⚠️ Submissions must not be accepted after the deadline.

Late submissions must be rejected at the backend.

5 Technical Constraints

- Database persistence mandatory
- No hardcoded data
- JWT + role checks required
- Environment variables for config

6 Frontend Requirements

- Submission form for USER
- Deadline display
- Submission overview for ADMIN

7 Submission Requirements (Strict)

GitHub Repository

- Backend source code
- Frontend source code
- Proper folder structure
- Clear and meaningful commit history

Live Deployment

- Live frontend deployment link
- Live backend deployment link
- Backend must be connected to the database

README.md (Mandatory)

The README file must include:

- Project overview
- Tech stack used
- User roles and permissions
- API endpoints
- Database schema or collections
- Steps to run the project locally
- Live frontend and backend links

8 Evaluation Note

Evaluation focuses on **revocation enforcement, role control, and end-to-end execution**.
