

HCLTech Recruitment Pattern – Student Guide

1. Recruitment Process at a Glance

Round	What students can expect	Primary focus	Priority
Round 1	Online Assessment	Aptitude + Technical MCQs + Coding	Very High
Round 2	Communication / Versant*	English + Speaking + Communication	High
Round 3	Technical Interview	Programming + OOP + DSA + SQL + CS fundamentals + Projects	Very High
Round 4	HR / Managerial	Communication + Career + Flexibility + Fit	High

*The communication/VERSANT round is **not universal across every HCLTech drive**. A recent GET candidate reported it as a separate round, while other recent candidates reported two online tests or a direct technical interview.

So students should prepare for the **full pattern**, rather than assuming every campus drive will have exactly the same number of rounds.

ROUND 1 – Online Assessment

A recent 2026 HCLTech syllabus source describes an assessment containing:

- Quantitative Aptitude
- Logical Reasoning
- Verbal Ability
- Computer Fundamentals
- Coding

with approximately **95 minutes** in that reported pattern.

However, actual HCLTech assessments vary by hiring program. Recent GET reports also describe assessments containing **aptitude + technical MCQs + two coding questions**.

Therefore, I would prepare the students around **five sections**.

A. Quantitative Aptitude

Tier 1 – Must Prepare

Topic	Priority
Percentages	★★★★★
Ratio & Proportion	★★★★★
Averages	★★★★★
Profit & Loss	★★★★★
Time & Work	★★★★★
Time, Speed & Distance	★★★★★
Number System	★★★★☆
HCF & LCM	★★★★☆

Tier 2

- Simple & Compound Interest
- Probability
- Permutation & Combination
- Mixtures & Allegations
- Ages
- Data Interpretation

Student expectation

Students should focus on:

Accuracy + speed + shortcut recognition

rather than attempting very advanced quantitative mathematics.

B. Logical Reasoning

High Priority

- Number series
- Letter series
- Coding-decoding
- Blood relations
- Direction sense
- Syllogisms
- Seating arrangement
- Puzzles
- Statement & conclusion
- Data sufficiency
- Pattern recognition

Special focus

Puzzles + arrangements + logical deduction

Students should practice solving these under strict time limits.

C. Verbal Ability

This deserves more attention for HCLTech than it usually gets in a DSA-focused preparation program.

Important areas

- Reading comprehension
- Sentence correction
- Grammar
- Error spotting
- Fill in the blanks

- Vocabulary
- Synonyms / antonyms
- Para jumbles
- Sentence arrangement

The assessment patterns reported for 2026 include a dedicated verbal component. ([Placement Preparation](#))

D. Computer Fundamentals

This is one of the **big differentiators** from a pure DSA preparation.

Priority 1

Programming

- Variables
- Data types
- Operators
- Conditions
- Loops
- Functions
- Arrays
- Strings
- Recursion
- Output prediction
- Basic debugging

OOP

- Class & Object
- Encapsulation
- Inheritance
- Polymorphism
- Abstraction
- Constructor
- Overloading
- Overriding

DBMS

- Primary key
- Foreign key
- Candidate key
- Normalization
- Joins
- GROUP BY

- HAVING
- Aggregate functions
- Subqueries
- Transactions
- ACID properties

A recent HCLTech GET interview specifically reported questions on **SQL JOINS and primary/foreign keys**.

E. Core CS Fundamentals

Students should not completely ignore these.

Operating Systems

- Process vs Thread
- Scheduling
- Deadlock
- Memory management
- Virtual memory
- Paging
- Synchronization

Computer Networks

- OSI model
- TCP/IP
- TCP vs UDP
- HTTP vs HTTPS
- IP address
- DNS
- Client-server model

Software Engineering

- SDLC
- Agile
- Testing basics
- Black-box vs white-box testing

One recent HCLTech interview report specifically mentions **Black Box Testing**.

F. Coding

This should remain an important part of the preparation.

Recent GET reports mention coding questions in the online assessment, and technical interviews have included basic DSA/coding such as finding the **second-largest element in an array**.

HCLTech Coding Priority

Topic	Priority
Arrays	★★★★★★
Strings	★★★★★★
Basic Searching	★★★★★★
Sorting	★★★★★★
Hashing	★★★★☆
Two Pointers	★★★★☆
Basic Recursion	★★★★☆☆
Stack	★★★★☆☆
Linked List	★★★★☆☆
Binary Search	★★★★☆
Matrix	★★★★☆☆
Basic Greedy	★★★★☆☆
Basic DP	★★★★☆☆

Typical problem level

Easy → Medium

The objective should be:

ROUND 2 — Communication / VERSANT

This needs to be treated as a **separate preparation track** if the particular HCLTech drive includes it.

A recent GET candidate reported:

Online Assessment → Versant → Technical Interview

with the Versant round focused on **communication and speaking skills**. ([Glassdoor](#))

Students should practice

- Reading aloud
- Listening comprehension
- Sentence repetition
- Speaking clearly
- Describing a situation
- Answering spontaneously
- Grammar
- Pronunciation
- Vocabulary

Most important

Students should avoid:

- One-word answers
- Memorized paragraphs
- Speaking too fast
- Excessive filler words
- Long pauses

The goal is **clear, understandable communication**, not sophisticated English.

ROUND 3 – Technical Interview

This is where HCLTech becomes significantly broader than DataAces.

Recent GET reports mention questions around:

- Projects
- OOP
- Basic DSA
- SQL
- Programming
- OS
- Core technical knowledge

One recent candidate specifically reported questions on **polymorphism, method overriding, second-largest element, SQL JOINS, primary/foreign keys**.

Technical Interview — Priority Matrix

Area	Priority
Projects / Resume	★★★★★
OOP	★★★★★
Programming Fundamentals	★★★★★
SQL / DBMS	★★★★★
DSA	★★★★☆
OS	★★★★☆
Computer Networks	★★★☆☆
Software Testing	★★★☆☆
Cloud / Technology Stack	★★★☆☆

OOP — Very Important

Students should be able to explain:

Fundamentals

- Class
- Object
- Constructor
- Encapsulation
- Inheritance
- Abstraction
- Polymorphism

Frequently asked distinctions

- Overloading vs Overriding
- Abstract class vs Interface
- Compile-time vs Runtime polymorphism
- Composition vs Inheritance
- Class vs Object

And they should be able to **write a small program demonstrating the concept.**

For example:

"Write a program to demonstrate method overriding."

That exact type of question has been reported in a recent HCLTech GET interview.

SQL / DBMS — Very Important

This should be a **major preparation area.**

SQL

Students should master:

SELECT

WHERE

GROUP BY

HAVING

ORDER BY

DISTINCT

LIMIT

Joins

INNER JOIN

LEFT JOIN

RIGHT JOIN

FULL JOIN

SELF JOIN

Aggregate functions

COUNT

SUM

AVG

MIN

MAX

Important interview concepts

- Primary Key
- Foreign Key
- Candidate Key
- Composite Key
- Normalization
- ACID
- Transactions
- Indexing
- DELETE vs TRUNCATE vs DROP

The recent GET interview evidence makes **SQL JOINS and key concepts** particularly worth prioritizing.

DSA — Interview Level

For HCLTech, students should confidently solve:

Arrays

- Largest element
- Second largest
- Missing number
- Duplicate number
- Frequency
- Rotate array
- Move zeroes
- Remove duplicates

Strings

- Reverse string
- Palindrome
- Anagram
- Character frequency
- First non-repeating character
- String compression

Searching / Sorting

- Linear search
- Binary search
- Bubble / Selection / Insertion
- Merge sort concept
- Quick sort concept

Basic patterns

- Two pointer
- Hashing
- Sliding window

The recent interview report specifically gives **second-largest element** as an example of the type of coding question asked.

Projects / Resume — VERY HIGH PRIORITY

This is one of the most important parts of HCLTech preparation.

Recent candidates report interview discussions beginning with **self-introduction and projects/internships**, sometimes going deep into the project.

Students should prepare:

Project Basics

- Problem statement
- Objective
- Features
- Architecture
- Technologies
- Database
- APIs
- Frontend
- Backend
- Deployment

Deep-dive questions

- Why did you choose this technology?
- Why this database?
- What was your contribution?
- What was the biggest challenge?
- How did you debug it?
- What performance problem did you face?
- How did you handle errors?
- What would you change if you rebuilt it?

- How would you scale it?

Golden rule

Anything mentioned on the resume is interviewable.

ROUND 4 — HR / Managerial

HCLTech's official hiring description says the HR interview is intended to understand candidates' **career goals, skills, strengths and interests.**

Students should prepare

- Tell me about yourself.
- Why HCLTech?
- Why should we hire you?
- Strengths
- Areas for improvement
- Career goals
- Teamwork experience
- Conflict resolution
- Leadership experience
- Willingness to relocate
- Shift flexibility
- Work-from-office expectations
- Learning new technologies

Students should answer naturally rather than memorizing a generic HR script.

HCLTech Preparation Priority

For your training program, I'd allocate preparation approximately like this:

Area	Preparation Weight
Programming + Coding/DSA	25%
CS Fundamentals + OOP	20%
DBMS + SQL	15%
Aptitude + Reasoning	15%
Projects / Resume	10%
Verbal / Communication	10%
HR	5%

These are **recommended training allocations**, not HCLTech's official scoring weights.
